📍 Ho Chi Minh, Viet Nam

OBJECTIVE

Highly motivated Software Engineering student with skills in front-end development using React and TypeScript. I am looking to contribute to your company as a Frontend Developer. Eager to learn and expand my skillset to become a well-rounded full-stack developer.

EDUCATION

**University of Information
Technology (UIT) - VNUHCM**

2020 - 2024

● *Software Engineering*

GPA: 3.01 / 4

PROJECTS

FINDER ADMIN WEBSITE

02/2024 - 06/2024

● *ReactJS, Angular, Microfrontend*

- The website uses Microfrontend to run ReactJS and Angular in the same website, optimize user experience, and help many teams code in one project.

• **Github:**

https://github.com/sang1833/Finder_Admin

FURNITURE STORE WEBSITE

03/2023 - 01/2024

● *ReactJS, Typescript*

- I developed a fully functional and responsive website using Redux, Tailwind CSS, Material UI (MUI), and Socket.io.
- The website features are user authentication, product listings, and interactive elements using Socket.IO for real-time communication.
